IDEA IDEA

- EN** **Renewable energy sources, military facilities and the connectivity of individual parts are the key content pillars in the design of the INDY project logo. Using various elements, we constructed a logo that covers a wide content area.**
- SI** Obnovljivi viri energije, vojaški objekti in povezljivost posameznih delov, so ključni vsebinski stebri pri snovanju logotipa projekta INDY. Z uporabo različnih elementov smo konstruirali logotip, ki zajema široko vsebinsko področje.

EN The basic shape of the logo is represented by a light bulb, which is a symbol of energy. It is designed in the form of a shield, which is a symbol of the army, the arrows that also appear in the negative space indicate renewable resources, and at the same time connect different parts.

SI Osnovno obliko logotipa predstavlja žarnico, ki je simbol energije. Oblikovana je v obliki ščita, ki je simbol vojske, puščice, ki se pojavijo tudi v negativnem prostoru nakazujejo obnovljiv vire, hkrati pa povezujejo različne dele.
