Waste and energy in military camps

Problem

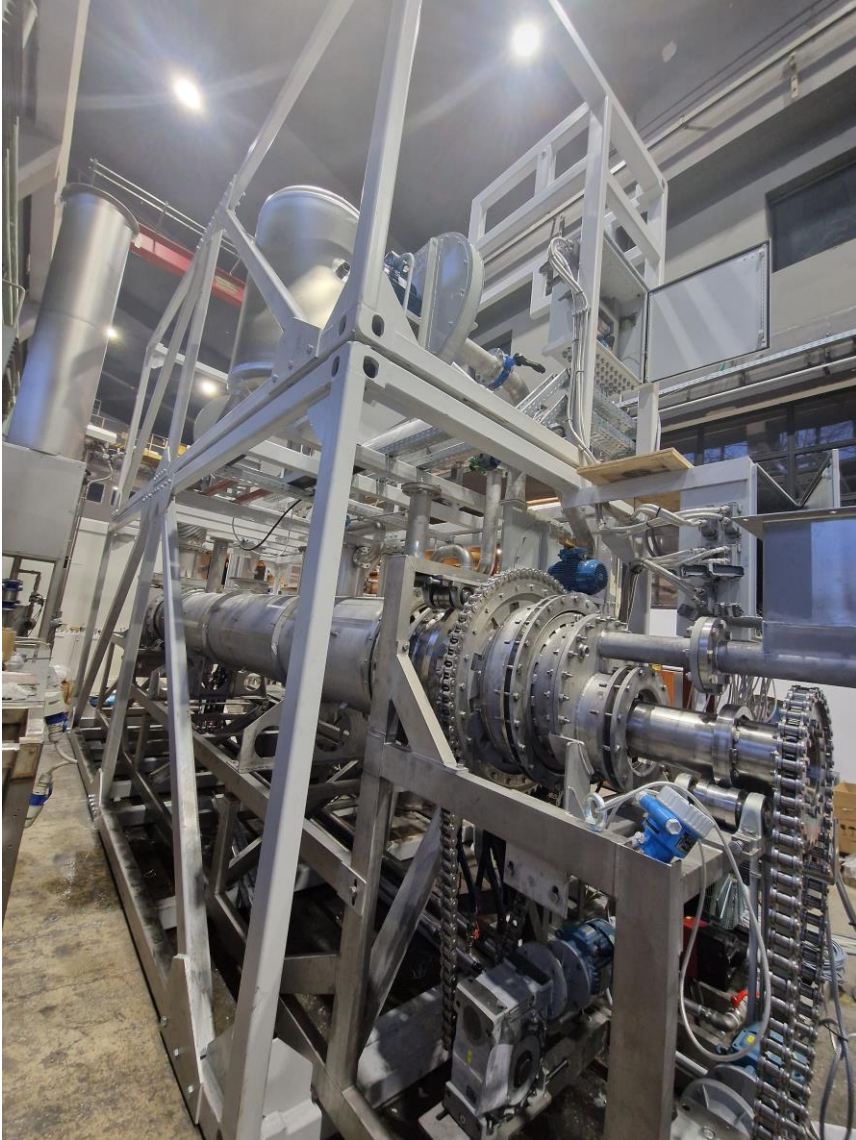

Waste to energy

Needs

Solution for military camps

- Waste management in military camps
- Energy production-hydrogen or heat/electricity
- Systems that can process 1 or 2 tonnes of waste daily
- Modularity-connection of multiple systems in series-for increase waste generation or energy need
- Compact design-easy transportation and installation
- Quick start

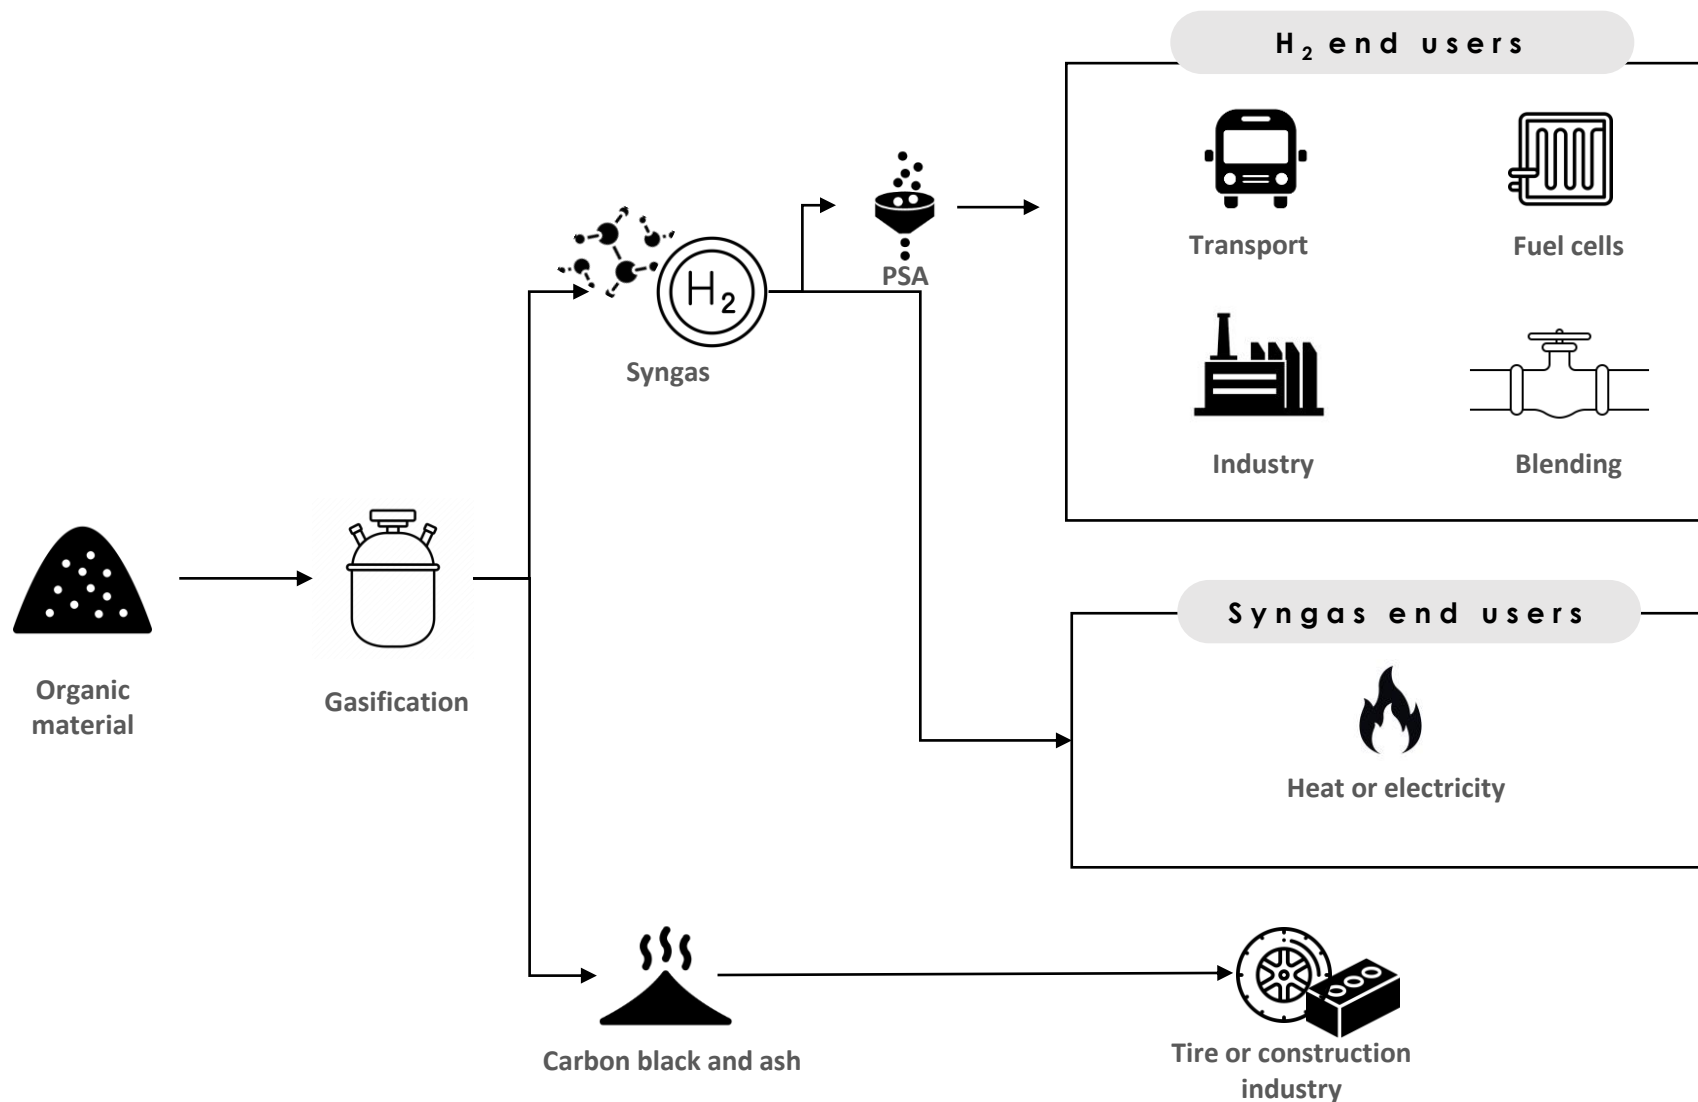

Advantages compared to conventional energy sources in military camps

- Independence from external energy sources
- Conversion of unwanted material into something useful

Endless possibilities
